The challenges in government IT never cease and they grow more complex over time. Every day presents a brave new world of navigating legacy systems, regulatory compliance, constituent demands, and staring down a gallery of bad actors seeking to undermine the security of your mission-critical systems.

The good news? Dedicated professionals come to work every day with a passion for protecting the public trust. Federal and state agencies, cities, school districts, colleges, universities and regional authorities constantly leverage technology to improve and protect the information of millions of Americans.

Weaver is on your side.

Since the founding of our IT Advisory Services practice in 2006, Weaver has worked hand-in-hand with some of the largest and most complex

government agencies in the country to provide effective solutions through IT and business process-focused assessments and audits, network security and pre- and post-implementation reviews.

Cities, school districts, retirement systems, lotteries and state-funded entities across the country rely on Weaver to perform advisory and assurance services, including numerous IT controls-related engagements and services. We understand the complexities of your technological operations, the challenges and risks specific to governments, and the nuanced IT and security requirements you must meet.

IT ADVISORY SERVICES

We are committed to helping governments meet regulatory requirements, but we also bring a long-term perspective to help them improve operations and services.

SOC 1, 2 and 3
SOC for Cybersecurity
SOC for Supply Chain

CYBERSECURITY SERVICES

To be effective, cybersecurity programs must provide an ongoing process that assesses risks, identifies threats, creates protections, monitors systems, and enables quick response and recovery. And that cybersecurity process must be embedded into the organization's governance, not just relegated to a corner of the IT department.

Weaver's cybersecurity services include:

Cyber Risk Assessment

GAP & Readiness Assessments

Vulnerability Assessments

Cyber Audits

Compliance Assessments

Penetration Tests

Maturity ASMT & Roadmaps

Social Engineering
